Why Xitavo® Soybean Seed

Trailblazing Innovation

- Exclusive Xitavo® varieties entered the market in 2025 exposing farmers to a **new diverse genetic base** never before available, **enhancing yield potential and disease mitigation**.
- Nemasphere™ Nematode Resistance Trait by BASF is the **most groundbreaking innovation** in SCN management in over 60 years — Harnessing a **completely novel mode of action** as the **first and only biotechnology trait for SCN**.
- Xitavo soybean seed offers a **revolutionary pipeline** including **future herbicide tolerant stacks** — this will enable a PPO innovation and an entirely new herbicide MOA (mode of action).

Unmatched Dedication to Soybeans

- We are committed to transforming the approach to soybean seed decision making. **By concentrating our efforts exclusively on soybeans**, we provide **deeper insights** and more **effective solutions**.
- **Variety Profile Index (VPI)** is revolutionizing the approach to soybean farming, creating an **unparalleled understanding** of yield development resulting in better product positioning and refined management strategies to increase profitability.
- Our dedicated, **local agronomy team** works alongside you to maximize your soybean yield potential with a portfolio of **proven, customized solutions**.

Quality Without Compromise

- Xitavo soybeans undergo **unsurpassed quality protocols** to ensure the highest vigor, seed coat integrity, visual appearance, and germination possible. Protocols include the use of accelerated aging, cold-germ, soak tests, and state-of-the-art conditioning equipment.
- Our strict Accelerated Aging standards protect **upwards of 5% of soybean yield**.*
- **Rigid quality control** processes ensure **superior seed quality** all the way to our authorized retail locations.
