CAUTION: This fertilizer contains boron. Its use on any crops or under conditions other than those recommended may result in serious injury to the crops.

PRODUCT INFORMATION: Over Pass[®] 10-2-10 contains slow release nitrogen to extend absorption and minimize any leaf interaction from the application of nitrogen. For best results, use in a program with First Pass, our premium soybean starter.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not mix with calcium based fertilizers. Do not allow to freeze. Over Pass[®] 10-2-10 is compatible with many crop protection products as a tank mix partner. The Andersons recommends a compatibility (jar) test before field mixing and application. Always read and follow all individual product labels before use. For more information, visit AndersonsPlantNutrient.com/Tank-Mix.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.

| | Application | Use Rate (per acre) | Timing |
